

## **Settlements and settlement patterns in Ptolemaic and Roman Thebes**

The paper aims to focus on the location, designation, organisation and development of all settlements in the Theban region (East and West bank) in Ptolemaic and Roman times. An up-to-date overview of the available archaeological and epigraphic evidence, including information provided by classic authors, on settlements in the Theban area will be used to study the layout, characteristics and development of individual settlements as well as to identify and analyse settlement patterns in Thebes at this time.
