

Joint Dissertation Review

Name of the student:	Kateřina Halenka
Title of the thesis:	Why are women becoming more entrepreneurial than man? Case Study: Czech Republic
Reviewer:	doc. PhDr. Pavel Kuchař, CSc.

1. KNOWLEDGE AND CONNECTION TO THE FIELD

(relevance of the research question, research objective, literature review):

The topic of the thesis reflect contemporary social problems. The way it is written in is quite interesting. The author proved knowledge and good orientation in appropriate professional literature. She defined the research questions relevant to the designated aims.

2. ANALYSIS

(methodology, argument, theoretical backing, appropriate work with sources):

The used methods as well as the selected model are adequate to the designated aim. However, in my view the model is lacking in the subject of education and the character of occupation. The thesis is based on relevant theoretical sources. The author demonstrated an above-standard way of the statistical data processing.

3. CONCLUSIONS

(persuasiveness, link between data and conclusions, achievement of research objectives):

The conclusions are clearly based on the findings. The theoretical part is properly connected with the analytical part.

4. FORMAL ASPECTS AND LANGUAGE

(appropriate language, adherence to academic standards, citation style, layout):

The citation of professional literature is appropriate, the study is clearly structured. I am not able to evaluate the language standard of the text.

5. SUMMARY ASSESSMENT

(strong and weak point of the dissertation, other issues)

The strong point of the dissertation is the used methodology which is above-standard. The weaker point is a fact that there are the subject of education and the character of occupation lacking among individual factors while both these characteristics are essential for a self-employment.

Grade (A-F):	Excellent B
