

Abstract

The bachelor thesis is concentrating on the history of the castle Rabí. I pay attention to the history of the castle itself in the first part of my thesis and I attempt to map its foundation, the origin of its name and, without omission, its owners who were withholding it. I attempt to introduce the way the castle was grasped in particular literary sources. The second part presents the evolution of the building process of the castle, in which I also mention a church of significant importance - The Holy Trinity Church. And of course the current functioning of the place. I concentrate on individual viewings. The goal of the thesis is to tight up the information about the castle since it has been founded till this day.
