

ANOTACE

THE ATTITUDE OFF AN ILL PERSON TOWARDS THE ILLNESS, HIS FAITH AND BEHAVIOUR OF THE RELATED PERSON

Work nears the illness as a part of one's life, it indicates a patient's alternation process of life circumstances. A social aspect of illness and fellow men's behaviour towards the patient is taken into account here. A symptom of illness is a pain.

A professional approach during illness solving and the aim – quality life of patients is seen from the how-to-sympathize-with-a-suffering-person view.

Pain, illness and suffering are seen from the faithful's view as the power that connects him/her with Christ.
