

Abstract

The subject of this bachelor thesis are five, respectively six sunken huts from the Hallstatt- La Tène period from the archeological site Dolní Břežany – Za pivovarem. The focus is on the catalog of sunken huts with their thorough description and chapter about the settlement context, mapping archeological sites from Hallstatt and La Tène period in the wider vicinity of the site. Next the thesis follows construction and shape evolution of sunken huts of Hallstatt and La Tène period, categorize them into published sorting systems and attempts to analyze and interpret construction relics. Attachments – maps, plans and photographs – are part of the bachelor thesis.

Keywords
