

In the first part of this work I wanted to describe the situation in children's homes in the poorest part of Ukraine – Zakarpatie. I summed up some information about history and about people, living in this country. I tried to find out reasons, which lead to the poorness of this region, and why people who live there, often leave to find work in another country. In the third part there can be found information, about volunteering and humanitarian work, about history, some well known humanitarian organizations. In the third, middle part I put the detailed describe of children's home in Vilšany. It presents which children live in this house, who works with them, how does the surroundings of the children's home look like ... In the fourth, final part, I wrote about the Bodaj organization, which helps in children's homes in this part of Ukraine. I described changes in management this volunteers organization. In the next part I wrote about volunteers coordination in Bodaj. Which changes will be made for better effective work.
