Baroque monuments in Lysá nad Labem

The final thesis deals with the theme Baroque monuments in Lysá nad Labem. This town is called „baroque pearl of Polabí“ because there is the unique complex of baroque monuments in this town.

We deal with the largest monuments: castle, garden by the castle with the sculptural decoration, building of the former monastýry and church of st. John Baptist. Mostly we resolve their an architecture and a sculpture less a painting.

This monuments have a complicated history which we deal with too. The greatest bloom of the town and monuments was in a time of earl František Antonín Špork who was a mæccenas of arts and rebuilt or built some part of these monuments. His time was a very great for the Lysá nad Labem.

Lysá nad Labem

Earl František Antonín Špork
