

Peter BUČKO, *The Cults of Hungarian saints of the 11th century*. Praha 2021. Doctoral dissertation.

Abstract

The presented dissertation deals with the cult of the oldest saints of the Kingdom of Hungary. These are persons who were canonized in 1083 - King Stephen, his son Emeric, Bishop Gerard and in 1083, also Zobor monks and hermits Zoerard-Andrew and Benedict, and in 1192 King Ladislav joined them. The work also examines saints without a documented official hagiography, namely the Great Moravian ruler Svatopluk, the bishop of Pécs Maurus and the Hungarian king Solomon. A wide source base was used to analyse cults and individual hagiographies. Emphasis was also placed on preserved material monuments, patronage, and feasts.
