

## **Abstract**

The thesis describes the relationship between the United States of America and Great Britain in the period before the Second World War, with emphasis on the interwar period. The two Anglophone countries have been in some elementary connection since the War of Independence, which did develop further during the administration of President Theodor Roosevelt and later his cousin and distant relative Franklin D. Roosevelt. However, close cooperation, as was the case after the outbreak of World War II and during the Cold War, was rather non-existent and relations were not always ideal. What never disappeared, however, was the mutual effort to lead the discussion, despite almost sometimes hostile relations. This work aimed to examine those difficult relations between Great Britain and the United States and to show how mutual relations changed and over time connected their destinies.
