

## **ABSTRACT**

The bachelor's thesis deals with the types of social services for physically and mentally disabled persons provided by the Evangelical Church in the territory of the Czech Republic.

The aim of the work is to map these services and thus enable an insight into the operation of daily and weekly care centre facilities, as the main providers of these services, their clients and the workload of their workers and managers. At the same time, it also focuses on the evangelical church as the operator, its history and also the geography of the care centre facilities in the Czech Republic. In the practical part of the thesis, in the form of a quantitative research strategy, three guardians determine their satisfaction with the facility and the staff of the Na palubě care facility and the benefit of the facility to their loved ones.
