

Bachelor's thesis deals with the topic of risky behavior on the internet with a focus on social networks. The aim of the thesis is to present the risks that children and adolescents are exposed to in today's time. The bachelor thesis is divided into two parts, a theoretical and a practical part. The theoretical part of the thesis describes social networks, explains the basic risks of the online world and focuses on prevention in this area. In the practical part, a quantitative research in the form of a questionnaire survey is conducted with a goal of finding out if education, primarily from parents or school, has a positive impact on the prevention of problematic online behavior.
