Abstract:

The presented bachelor thesis concentrates on the analysis and elaboration of the terminology in the field of horse breeding and horsemanship in the Large German-Czech Academic Dictionary, according to the requirements of the lexical database LGCAD. The bachelor thesis is divided into a theoretical and a practical part. The theoretical part is based on modern lexicographical literature, defines the term of professional language, professional terminology, and terminological dictionary, and deals with the professional language of horse breeding and horsemanship. The main part of the thesis deals with critical analyses of the treatment of terms in various handbooks, focusing on several items such as morphology extent, and quality of equivalence, registration of typical collocation, terminological synonymy and lexicographic example, and bringing to justice several terminological inaccuracies found in the available literature. The practical part consists of fifty elaborated terms from the field of horse breeding and horsemanship.
