

Abstract

This bachelor thesis focuses on whether students of Charles University prefer electronic or printed formats of study materials and what are the reasons for choosing the preferred format. The theoretical part was dedicated to a review of foreign research in the field of university students' preference between printed and electronic study materials and a brief description of the printed and electronic study materials available to Charles University students in university libraries. The practical part will be developed with the help of a questionnaire survey that will focus on students' preferences regarding the format of study materials for academic purposes, reasons for preferring electronic or printed documents and the impact of the COVID-19 pandemic on these preferences.
