

In the first part of my thesis I attend to the basic types of education, which are now proceeding in the modern Africa. I mention five basic types of education, that are adherent to African continent. In the next part of my work I focus on each single African land and lay the biggest stress on the history, presence and eventually future of the local education. In detail I deal with educational levels and history, which refers to education. There is not so much specialized literature about the educational system in Africa ant that is why I would like to create a basic brief compendium of educational system in the African lands and facilitate other people to learn more about this topic collectively in one publication. I have been cooperated with the embassies of the African lands, government departments and with clerical and international organizations.
