

English annotation — The Negative theology in writings of the Denys the Areopagite

In this thesis I am trying to describe the middle way of testifying about God, his presence, his being, about his activity in the soul of men and his activity in the World. This way is known as the apophatic way or the way of negations. For better understanding we need to concern with authors like Platon and his followers. From patristic Fathers I choused the Gregory of Nyssa whom I am using like a bridge to get to the Denys the Areopagite and his teaching. “Modern” influences of Arepagite’s teaching I follow in the book *The Mystical Theology of the Eastern Church* written by Russian author Vladimir Lossky.

Crucial words: negative theology, negative way, the way of apophasis, testifying about God, Denys the Areaopagite, Platon, the Eastern Church, Vladimir Lossky.
