

## Summary

### Hana Rabenhauptová - Chateau Kratochvíle - stucco and painting decoration

The bachelor thesis „Chateau Kratochvíle - stucco and painting decoration“ deals with the actual state of the stucco relief decorations, mural and ceiling paintings and paintings in exteriors. The author describes the individual scenes as they can be seen today including individual parts of these scenes and the figures painted as well as what has been preserved only as hardly identifiable fragments. As for the most relief decorations and paintings, the author found in the literature their iconography and mentioned also several significant models according to which the decoration in Kratochvíle was made. The renovation works held in Kratochvíle which influenced the actual look of Kratochvíle were also the issue of this thesis. During last thirty years, significant works have been held in Kratochvíle which gave the Chateau its original splendour. The renovation works were undertaken in a highly sensitive and regardful way in order to protect the original stucco and painting decoration.
