

Abstract

Author: Věra Machancová

Institution: Catholic Theological Faculty of the Charles University in Prague

Title of the work: The Positive Influence of Christian Environment and its Impact on Children's Lives

Number of pages: 50

Number of literary works used: 21

Number of characters: 89,569

Key words:

Child, development, family, christian environment, God's love

Summary:

The work deals with the influence of Christian environment on the pre-school child's life. It gives a brief description of the stages of the child's development from the birth up to the age of 6. It goes on to give a more detailed description of some representative areas of Christian and secular environment, such as the Christian family, the Church, the consumer way of life, the Christian kindergarten, etc., and their specific influence on the child. The work also makes an attempt to find out whether these areas influence the child in a positive or in a negative way and how they can stimulate the child to form a positive attitude towards life and faith.
