

Anglický název bakalářské práce

Architecture of the Secession Period in Kladno

Anglická anotace

The bachelor thesis focuses on the city of Kladno at the end of 19th century and beginning of 20th century. Kladno at that time began to flourish through the development of industry and many people came to Kladno to get a new work. This time is associated with the emerging secession architecture. The aim of the thesis is to point out several examples of secession buildings in Kladno and characterize the architectural development of this region.
