

SUMMARY

The Influence of the Preparatory Course of the Centre for Family on Life in Matrimony

This diploma work arises from the needs of the Centre for Family in Prague. It would like to get to know the results of the work of the Centre to be able to provide better service to fiancé pairs.

I was dealing with the view of the Catholic Church on matrimony in the introductory part. I brought near the characteristics of matrimonies in the Czech Republic and its qualities in the light of current research. I introduced the demands of the preparation on life in matrimony as the Church formulates it and also the form of the preparatory course of the Centre for Family in Prague with the experience from this work. I created a questionnaire to find out the influence of preparation on the life of a married couple within five years after going through the prep-course. A questionnaire inquiry passed through, in which the data needed for the research were picked up.

In the final part there are made proposals to completet the work of the prep-course on life in matrimony in the Centre for Family in Prague.
