

## Life in the Trinity – Development of the trinital experience at Saint Teresa from Jesus

### Abstract

This bachelor thesis consists from three parts. The first one deals with periods of the spiritual development in her life. In the second part, I am trying to analyze theologically the trinital texts of our saint in the context of her spiritual development. From this, I further deduce a paradigm of the trinital mystical experience. In the last part I consider a pastoral application of the teresian trinital experience.

Key words: Saint Teresa from Jesus, spiritual development, mystical theology, companionship of Jesus, trinital experience, pastoral application
