

Abstract (in English):

The aim of this paper is to examine the role of Slavic substantive borrowings in Romanian vocabulary. Selected substantive loans are divided into five semantic areas. Analysis of each of them contains a series of synonyms, functional and stylistic inclusion in the Romanian vocabulary, idioms of which is part given lexical unit, and its derivatives. The result is a semantic classification of lexems of Slavic origin in the Romanian vocabulary, their stylistic stratification and position within the synonymic series.
