

ThLic. Mgr. Adam Sýkora: *Missale Poseniense I.* — critical edition (theseis), Charles University in Prague, Faculty of Catholic Theology, 2017.

In the present thesis the author provides a critical edition of one of the oldest missals of Bratislava Chapter House: *Missale Poseniense I.* It is important source of European significance, which is pattern normative and representative in relation to the similar codices, and which was used in the Bratislava Chapter House before 1341st. Their significance is decisive since it is independent on the *Missalia* from the time Innocent III, and on the reform of Haymo of Faversham. The missal contains also the parts from *Pontificale*, *Ordines* and *Breviarium*.

The text of this Missal was previously published only in facsimile form, which bears the technical limitations of the period of its creation. Since that time, other folios have been discovered that have not been published at all.

Experts now has the text, with which can work effectively. Critical apparatus facilitate the work with the text, as well as indexes, tables and photo documentation attached.

Keywords: Roman Missal, *Missale Romanum*, *Missale Poseniense I.*, Bratislava Missal I., *Missale Bratislaviense I.* [sic], *Missale notatum Strigoniense*, Ordinary, proprium, critical edition, *Pontificale*, *Ordines*.
